

Portfolio Builder would have performed above the USDA average farm price in 8 of the last 10 years.

Portfolio Builder performs best in traditional carry markets, when grain stocks are high. Over the last 10 years, when the stocks-to-use ratio is greater than 10%, the Portfolio Builder¹ price exceeds the average farmer sale² by an average of 57 cents per bushel. Take advantage of seasonal market movements and add diversification and discipline to your marketing plan with Portfolio Builder.

¹Portfolio Builder values listed are December corn final values.

²Average Farm Price is annual estimated cash value for corn, as published by the USDA

Values shown in the chart is the difference in price between Portfolio Builder and the average farm price.

Designed to take advantage of seasonal market movements.
